(An Exploration Stage Company)

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

September 30, 2012

(Unaudited – Expressed in United States dollars)

**1. NATURE AND CONTINUANCE OF OPERATIONS**

Entrée Gold Inc. was incorporated under the laws of the Province of British Columbia on July 19, 1995 and continued under the laws of the Yukon Territory on January 22, 2003. On May 27, 2005, Entrée Gold Inc. changed its governing jurisdiction from the Yukon Territory to British Columbia by continuing into British Columbia under the *Business Corporations Act* (British Columbia). The principal business activity of Entrée Gold Inc., together with its subsidiaries (collectively referred to as “the Company”), is the exploration of mineral property interests. To date, the Company has not generated significant revenues from its operations and is considered to be in the exploration stage.

All amounts are expressed in United States dollars, except for certain amounts denoted in Canadian dollars (“C\$”), and Australian dollars (“A\$”).

These consolidated financial statements have been prepared on the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. The Company currently earns no operating revenues. Continued operations of the Company are dependent upon the Company’s ability to secure additional equity capital or receive other financial support, and in the longer term to generate profits from business operations. Management believes the Company needs additional working capital to maintain current operations for the next 12 months.

**2. BASIS OF PRESENTATION**

The interim period financial statements have been prepared by the Company in conformity with generally accepted accounting principles in the United States of America. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements, and in the opinion of management these financial statements contain all adjustments necessary (consisting of normally recurring adjustments) to present fairly the financial information contained therein. Certain information and footnote disclosure normally included in the financial statements prepared in conformity with generally accepted accounting principles in the United States of America have been condensed or omitted. These interim period statements should be read together with the most recent audited financial statements and the accompanying notes for the year ended December 31, 2011. The results of operations for the nine months ended September 30, 2012 are not necessarily indicative of the results to be expected for the year ending December 31, 2012.

**3. SIGNIFICANT ACCOUNTING POLICIES**

These consolidated financial statements follow the same significant accounting principles as those outlined in the notes to the audited consolidated financial statements for the year ended December 31, 2011.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

September 30, 2012

(Unaudited – Expressed in United States dollars)

**7. ACQUISITIONS (cont'd...)**

The Company allocated the consideration to assets acquired and liabilities assumed as follows:

---

Cash	\$	837,263
Receivables and deposits		174,440
Investments		895,273
Mineral property interests		47,979,966
Equipment		1,488
Accounts payable and accrued liabilities		(128,689)
Deferred income tax liability		(13,991,460)
	\$	<u>35,768,281</u>

---

For the purposes of these consolidated financial statements, the purchase consideration has been allocated to the fair value of assets acquired and liabilities assumed, based on management's best estimates and taking into account all available information at the time of acquisition as well as applicable information at the time these consolidated financial statements were prepared.

**8. MINERAL PROPERTY INTERESTS**

Title to mineral property interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral property interests. The Company has investigated title to its mineral property interests and, to the best of its knowledge, title to the mineral property interests is in good standing.

***Material Properties***

The Company's two principal assets are its interest in the Lookout Hill copper-gold property in Mongolia, and the Ann Mason copper-molybdenum project in Nevada.

**Lookout Hill, Mongolia**

The Lookout Hill property in the South Gobi region of Mongolia is comprised of two mining licences, Shivee Tolgoi and Javhlant, granted by the Mineral Resources Authority of Mongolia in October 2009. Title to the two licences is held by the Company.

In October 2004, the Company entered into an arm's-length Equity Participation and Earn-In Agreement (the "Earn-In Agreement") with Turquoise Hill. Under the Earn-In Agreement, Turquoise Hill agreed to purchase equity securities of the Company, and was granted the right to earn an interest in what is now the eastern portion of the Shivee Tolgoi mining licence and all of the Javhlant mining licence (together the "Joint Venture Property"). Most of Turquoise Hill's rights and obligations under the Earn-In Agreement were subsequently assigned by Turquoise Hill to what was then its wholly-owned subsidiary, OTLLC. The Government of Mongolia subsequently acquired a 34% interest in OTLLC from Turquoise Hill.

On June 30, 2008, OTLLC gave notice that it had completed its earn-in obligations by expending a total of \$35 million on exploration of the Joint Venture Property. OTLLC earned an 80% interest in all minerals extracted below a sub-surface depth of 560 metres from the Joint Venture Property and a 70% interest in all minerals extracted from surface to a depth of 560 metres from the Joint Venture Property. In accordance with the Earn-In Agreement, the Company and OTLLC formed a joint venture (the "Entrée-OTLLC Joint Venture") on terms annexed to the Earn-In Agreement.

The portion of the Shivee Tolgoi mining licence outside of the Joint Venture Property ("Shivee West") is 100% owned by the Company, but is subject to a first right of refusal by OTLLC.

The Shivee Tolgoi and Javhlant mining licences were each issued for a 30 year term and have rights of renewal for two further 20 year terms.

As of September 30, 2012, the Entrée-OTLLC Joint Venture had expended approximately \$23.7 million to advance the Joint Venture Property. **Ann Mason, Nevada, United States**

The Ann Mason Project is defined by a series of both unpatented lode claims on public land administered by the Bureau of Land Management, and title to patented lode claims. The Company assembled this package of claims through a combination of staking and a series of transactions undertaken since August 2009, including the acquisition of PacMag. The project area includes the Ann Mason copper-molybdenum porphyry deposit, the Blue Hill copper deposit, and several early-stage copper porphyry targets including the Blackjack, Roulette and Minnesota targets.

Certain of the unpatented lode claims (part of the area formerly known as the Blackjack property) are leased to the Company pursuant to a mining lease and option to purchase agreement ("MLOPA") with two individuals. Under the MLOPA, the Company is granted the option to purchase the claims for \$500,000. If the Company exercises its option, the claims will be subject to a 3% net smelter returns ("NSR") royalty (which may be bought down to a 1% NSR royalty for \$2 million). The MLOPA also provides for annual advance minimum royalty payments of \$27,500 which commenced in June 2011 and will continue until the commencement of sustained commercial production. The advance payments will be credited against future royalty payments or the buy down of the royalty.

In September 2009, the Company entered into an agreement with Bronco Creek Exploration Inc. ("Bronco Creek"), a wholly-owned subsidiary of Eurasian Minerals Inc., whereby the Company may acquire an 80% interest in certain unpatented lode claims formerly known as the Roulette property. In order to acquire its interest, the Company must: (a) incur expenditures of \$1,000,000, make cash payments of \$140,000 and issue 85,000 common shares of the Company within three years (completed); (b) make aggregate advance royalty payments totalling \$375,000 between the fifth and tenth anniversaries of the agreement; and (c) deliver a bankable feasibility study before the tenth anniversary of the agreement.

Certain of the patented lode claims are subject to a 2% NSR royalty in favour of AngloGold Ashanti (Nevada) Corp.

During the nine months ended September 30, 2012, the Company, through a combination of staking and purchase agreements, acquired certain patented and unpatented lode claims within or contiguous to the boundaries of its Ann Mason Project pursuant to which the Company paid \$3,721,170 and issued 40,000 common shares valued at \$52,293.

non-employees is recognized over the contract services period or, if none exists, from the date of grant until the options vest. Compensation associated with unvested options granted to non-employees is re-measured on each balance sheet date using the Black-Scholes option pricing model.

The Company uses historical data to estimate option exercise, forfeiture and employee termination within the valuation model. The expected term of the options approximates the full term of the options. The risk-free interest rate is based on a treasury instrument whose term is consistent with the expected term of the stock options. The Company has not paid and does not anticipate paying dividends on its common stock; therefore, the expected dividend yield is assumed to be zero. Companies are required to utilize an estimated forfeiture rate when calculating the expense for the reporting period. Based on the best estimate, management applied the estimated forfeiture rate of Nil in determining the expense recorded in the accompanying Statements of Operations.
