REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Directors of
Entree Gold Inc.

We have audited the accompanying consolidated financial statements of Entrée Gold Inc. (the “Company”), which comprise the consolidated balance sheets as of December 31, 2013 and December 31, 2012, and the related consolidated statements of operations and comprehensive loss, stockholders’ equity, and cash flows for the years ended December 31, 2013, December 31, 2012 and December 31, 2011, and from the date of inception (July 19, 1995) to December 31, 2013. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Entrée Gold Inc. as of December 31, 2013 and December 31, 2012, and the results of its operations and its cash flows for the years ended December 31, 2013, December 31, 2012 and December 31, 2011, and from the date of inception (July 19, 1995) to December 31, 2013 in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Entrée Gold Inc.’s internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control—Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated March 27, 2014, expressed an unqualified opinion.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Directors of
Entree Gold Inc.

We have audited Entrée Gold Inc.'s internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control—Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)". Entrée Gold Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the entity's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

An entity's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. An entity's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and directors of the entity; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the entity's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Entrée Gold Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control—Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)".

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets and the related consolidated statements of operations and comprehensive loss, stockholders' equity, and cash flows of Entrée Gold Inc. and our report dated March 27, 2014, expressed an unqualified opinion.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2013

(Expressed in United States dollars)

1. NATURE AND CONTINUANCE OF OPERATIONS

Entrée Gold Inc. was incorporated under the laws of the Province of British Columbia on July 19, 1995 and continued under the laws of the Yukon Territory on January 22, 2003. On May 27, 2005, Entrée Gold Inc. changed its governing jurisdiction from the Yukon Territory to British Columbia by continuing into British Columbia under the *Business Corporations Act* (British Columbia). The principal business activity of Entrée Gold Inc., together with its subsidiaries (collectively referred to as the "Company"), is the exploration of mineral property interests. To date, the Company has not generated significant revenues from its operations and is considered to be in the exploration stage.

All amounts are expressed in United States dollars, except for certain amounts denoted in Canadian dollars ("C\$"), and Australian dollars ("A\$").

These consolidated financial statements have been prepared on the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. The Company currently earns no operating revenues. Continued operations of the Company are dependent upon the Company's ability to secure additional equity capital or receive other financial support, and in the longer term to generate profits from business operations. Management believes that the Company has sufficient working capital to maintain its operations for the next fiscal year.

2. SIGNIFICANT ACCOUNTING POLICIES**Principles of consolidation**

These consolidated financial statements have been prepared in conformity with generally accepted accounting principles ("GAAP") in the United States of America and include the accounts of the Company and all of its subsidiaries. All significant intercompany transactions and balances have been eliminated upon consolidation.

Use of estimates

The preparation of consolidated financial statements in accordance with United States generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. The Company regularly evaluates estimates and assumptions related to deferred income tax asset valuations, asset impairment, stock-based compensation, valuation of asset-backed commercial paper and loss contingencies. The Company bases its estimates and assumptions on current facts, historical experience and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgements about the other sources. The actual results experienced by the Company may differ materially and adversely from the Company's estimates. To the extent there are material differences between estimates and the actual results, future results of operations will be affected.

Cash and cash equivalents

Cash and cash equivalents includes cash in banks, money market funds, and certificates of term deposits with maturities of less than three months from inception, which are readily convertible to known amounts of cash and which, in the opinion of management, are subject to an insignificant risk of loss in value. The Company had \$46,701,216 in cash at December 31, 2013.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2013

(Expressed in United States dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**Long-term investments**

Long-term investments in companies in which the Company has voting interests of 20% to 50% or where the Company has the ability to exercise significant influence, are accounted for using the equity method. Under this method, the Company's share of the investees' earnings and losses is included in operations and its investments therein are adjusted by a like amount. Dividends received are credited to the long-term investment accounts.

Other long-term investments are classified as "available-for-sale" investments and unrealized gains and losses on these investments are recorded in accumulated other comprehensive income as a separate component of stockholders' equity, unless the declines in market value are judged to be other than temporary, in which case the losses are recognized in income in the period. Gains and losses from the sale of these investments are included in income in the period.

Equipment

Equipment, consisting of office, computer, field equipment and buildings, is recorded at cost less accumulated depreciation. Depreciation is recorded on a declining balance basis at rates ranging from 20% to 30% per annum.

Mineral property interests

Costs of exploration and costs of carrying and retaining unproven properties are expensed as incurred. The Company considers mineral rights to be tangible assets and accordingly, the Company capitalizes certain costs related to the acquisition of mineral rights.

Asset retirement obligation

The Company records the fair value of the liability for closure and removal costs associated with the legal obligations upon retirement or removal of any tangible long-lived assets where the initial recognition of any liability will be capitalized as part of the asset cost and depreciated over its estimated useful life. To date, the Company has not incurred any asset retirement obligations.

Impairment of long-lived assets

Long-lived assets are continually reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the discounted carrying amount of the assets exceeds the fair value of the assets.

Stock-based compensation

The Company applies the fair value method of accounting for all stock option awards, whereby the Company recognizes a compensation expense for all stock options awarded to employees, officers and consultants based on the fair value of the options on the date of grant, which is determined using the Black Scholes option pricing model. The options are expensed over the vesting period of the options.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2013

(Expressed in United States dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**Financial instruments**

The Company measures the fair value of financial assets and liabilities based on GAAP guidance which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements.

Under GAAP, fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. A fair value hierarchy is also established, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

Level 1 – Quoted prices in active markets for identical assets or liabilities.

Level 2 – Quoted prices for similar assets and liabilities in active markets or inputs that are observable.

Level 3 – Inputs that are unobservable (for example cash flow modelling inputs based on assumptions).

Income taxes

The Company follows the asset and liability method of accounting for income taxes whereby deferred income taxes are recognized for the deferred income tax consequences attributable to differences between the financial statement carrying values of existing assets and liabilities and their respective income tax bases (temporary differences). Deferred income tax assets and liabilities are measured using enacted income tax rates expected to apply to taxable income in the years in which temporary differences are expected to be recovered or settled. The effect on deferred income tax assets and liabilities of a change in tax rates is included in income in the period in which the change occurs. The amount of deferred income tax assets recognized is limited to the amount that is more likely than not to be realized.

Foreign currency translation

The functional currency of the Company is the Canadian dollar. Accordingly, monetary assets and liabilities denominated in a foreign currency are translated at the exchange rate in effect at the balance sheet date while non-monetary assets and liabilities denominated in a foreign currency are translated at historical rates. Revenue and expense items denominated in a foreign currency are translated at exchange rates prevailing when such items are recognized in the statement of operations and comprehensive loss. Exchange gains or losses arising on translation of foreign currency items are included in the statement of operations and comprehensive loss.

The Company follows the current rate method of translation with respect to its presentation of these consolidated financial statements in the reporting currency, which is the United States dollar. Accordingly, assets and liabilities are translated into United States dollars at the period-end exchange rates while revenue and expenses are translated at the prevailing exchange rates during the period. Related exchange gains and losses are included in a separate component of stockholders' equity as accumulated other comprehensive income.

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**Net loss per share**

Basic net loss per share is computed by dividing the net loss for the period attributable to common stockholders by the weighted average number of shares of common stock outstanding during the period. Diluted net loss per share takes into consideration shares of common stock outstanding (computed under basic loss per share) and potentially dilutive shares of common stock. Diluted net loss per share is not presented separately from basic net loss per share as the conversion of outstanding stock options and warrants into common shares would be anti-dilutive. At December 31, 2013, the total number of potentially dilutive shares of common stock excluded from basic net loss per share was 14,400,500 (December 31, 2012 - 9,223,000; December 31, 2011 - 9,135,500).

Comparative figures

Certain comparative figures have been reclassified to conform with the current year's presentation.

Recent accounting pronouncements

The accounting pronouncements issued by the Financial Accounting Standards Board during the year ended December 31, 2013 were not applicable to the Company.

3. CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of cash at bank and in hand of \$46,701,216 as at December 31, 2013 (December 31, 2012 - \$4,255,508).

4. LONG-TERM INVESTMENTS***Equity Method Investment***

The Company accounts for its interest in a joint venture with Oyu Tolgoi LLC ("OTLLC"), a company owned 66% by Turquoise Hill Resources Ltd. (formerly Ivanhoe Mines Ltd.) ("Turquoise Hill") and 34% by the Government of Mongolia (Note 7), as a 20% equity investment. The Company's share of the loss of the joint venture is \$146,051 for the year ended December 31, 2013 (December 31, 2012 - \$1,012,156; December 31, 2011 - \$2,397,085) plus accrued interest expense of \$260,453 for the year ended December 31, 2013 (December 31, 2012 - \$229,359; December 31, 2011 - \$151,952).

6. MINERAL PROPERTY INTERESTS

Title to mineral property interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral property interests. The Company has investigated title to its mineral property interests and, except as otherwise disclosed below, to the best of its knowledge, title to the mineral property interests is in good standing.

Material Properties

The Company's two principal assets are its interest in the Lookout Hill property in Mongolia, and the Ann Mason project (the "Ann Mason Project") in Nevada.

Lookout Hill, Mongolia

The Lookout Hill property in the South Gobi region of Mongolia is comprised of two mining licences, Shivee Tolgoi and Javhlant, granted by the Mineral Resources Authority of Mongolia ("MRAM") in October 2009. Title to the two licences is held by the Company.

In October 2004, the Company entered into an arm's-length Equity Participation and Earn-In Agreement (the "Earn-In Agreement") with Turquoise Hill. Under the Earn-In Agreement, Turquoise Hill agreed to purchase equity securities of the Company, and was granted the right to earn an interest in what is now the eastern portion of the Shivee Tolgoi mining licence and all of the Javhlant mining licence (together the "Joint Venture Property"). Most of Turquoise Hill's rights and obligations under the Earn-In Agreement were subsequently assigned by Turquoise Hill to what was then its wholly-owned subsidiary, OTLLC. The Government of Mongolia subsequently acquired a 34% interest in OTLLC from Turquoise Hill.

On June 30, 2008, OTLLC gave notice that it had completed its earn-in obligations by expending a total of \$35 million on exploration of the Joint Venture Property. OTLLC earned an 80% interest in all minerals extracted below a sub-surface depth of 560 metres from the Joint Venture Property and a 70% interest in all minerals extracted from surface to a depth of 560 metres from the Joint Venture Property. In accordance with the Earn-In Agreement, the Company and OTLLC formed a joint venture (the "Entrée-OTLLC Joint Venture") on terms annexed to the Earn-In Agreement.

The portion of the Shivee Tolgoi mining licence outside of the Joint Venture Property ("Shivee West") is 100% owned by the Company, but is subject to a right of first refusal by OTLLC.

The conversion of the original Shivee Tolgoi and Javhlant exploration licences into mining licences was a condition precedent to the Investment Agreement (the "Investment Agreement") between Turquoise Hill, OTLLC, the Government of Mongolia and Rio Tinto International Holdings Limited. The licences are part of the contract area covered by the Investment Agreement, although the Company is not a party to the Investment Agreement. The Shivee Tolgoi and Javhlant mining licences were each issued for a 30 year term and have rights of renewal for two further 20 year terms.

On February 27, 2013, notice (the "Notice") was delivered to the Company that the Ministry of Mining had cancelled the July 2009 Order (the "2009 Order") registering the reserves on the Joint Venture Property. The Notice stated that the 2009 Order breached sections of the Minerals Law of Mongolia and Charter of the Minerals Resource Counsel that give the head of MRAM the authority to register reserves, rather than the Minister of Mineral Resources and Energy. The Notice further advised that the Company is temporarily restricted from transferring, selling or leasing the Shivee Tolgoi and Javhlant mining licences. On September 4, 2013, the Minister of Mining issued Order No. 179, advising the Minerals Professional Council to re-submit its previous conclusions regarding the reserves to MRAM for review and registration.

6. MINERAL PROPERTY INTERESTS (cont'd...)***Material Properties*** (cont'd...)**Lookout Hill, Mongolia** (cont'd...)

On September 6, 2013, the head of MRAM ordered that the reserves on the Joint Venture Property be registered. The Company was also subsequently advised that the temporary transfer restriction on the joint venture mining licences will be lifted.

As of December 31, 2013, the Entrée-OTLLC Joint Venture had expended approximately \$26.3 million to advance the Joint Venture Property. Under the terms of the Entrée-OTLLC Joint Venture, OTLLC contributed on behalf of the Company its required participation amount charging interest at prime plus 2% (Note 7).

Ann Mason, Nevada, United States

The Ann Mason Project is defined by a series of both unpatented lode claims on public land administered by the Bureau of Land Management, and title to patented lode claims. The project area includes the Ann Mason and the Blue Hill deposits, and several early-stage copper porphyry targets including the Blackjack IP, Blackjack Oxide, Roulette and Minnesota targets.

Certain of the unpatented lode claims are leased to the Company pursuant to a mining lease and option to purchase agreement ("MLOPA") with two individuals. Under the MLOPA, the Company is granted the option to purchase the claims for \$500,000. If the Company exercises its option, the claims will be subject to a 3% net smelter returns ("NSR") royalty (which may be bought down to a 1% NSR royalty for \$2 million). The MLOPA also provides for annual advance minimum royalty payments of \$27,500 which commenced in June 2011 and will continue until the commencement of sustained commercial production. The advance payments will be credited against future royalty payments or the buy down of the royalty.

In September 2009, the Company entered into an agreement whereby the Company may acquire an 80% interest in certain unpatented lode claims formerly known as the Roulette property. In order to acquire its interest, the Company must: (a) incur expenditures of \$1,000,000, make cash payments of \$140,000 and issue 85,000 common shares of the Company within three years (completed); (b) make aggregate advance royalty payments totalling \$375,000 between the fifth and tenth anniversaries of the agreement; and (c) deliver a bankable feasibility study before the tenth anniversary of the agreement.

During the year ended December 31, 2012, the Company, through a combination of staking and purchase agreements, acquired certain patented and unpatented lode claims within or contiguous to the boundaries of its Ann Mason Project pursuant to which the Company paid \$3,721,170 and issued 40,000 common shares valued at \$52,293.

In February 2013, the Company entered into an agreement with Sandstorm Gold Ltd. ("Sandstorm") whereby the Company granted Sandstorm a 0.4% NSR royalty over certain of the unpatented lode claims, including the claims covering the Ann Mason and Blue Hill deposits, in return for an upfront payment of \$5 million (the "Sandstorm NSR Payment") which was recorded as a recovery to acquisition costs. In addition, certain of the patented lode claims are subject to a 2% NSR royalty.

7. LOANS PAYABLE

Under the terms of the Entrée-OTLLC Joint Venture (Note 6), OTLLC will contribute funds to approved joint venture programs and budgets on the Company's behalf. Interest on each loan advance shall accrue at an annual rate equal to OTLLC's actual cost of capital or the prime rate of the Royal Bank of Canada, plus two percent (2%) per annum, whichever is less, as at the date of the advance. The loans will be repayable by the Company monthly from ninety percent (90%) of the Company's share of available cash flow from the Entrée-OTLLC Joint Venture. In the absence of available cash flow, the loans will not be repayable. The loans are not expected to be repaid within one year.

8. SANDSTORM FINANCING ARRANGEMENT

In February 2013, the Company entered into an equity participation and funding agreement with Sandstorm that provided an upfront deposit (the "Deposit") from Sandstorm of \$40 million. The Company will use future payments that it receives from its mineral property interests to purchase and deliver metal credits to Sandstorm, in amounts that are indexed to the Company's share of gold, silver and copper production from the Joint Venture Property as follows:

- 25.7% of the Company's share of gold and silver, and 2.5% of the Company's share of copper, produced from the portion of the Shivee Tolgoi mining licence included in the Joint Venture Property; and
- 33.8% of the Company's share of gold and silver, and 2.5% of the Company's share of copper, produced from the Javhlant mining licence.

In addition to the Deposit, upon delivery of the metal credits Sandstorm will make a cash payment to the Company equal to the lesser of the prevailing market price and \$220 per ounce of gold, \$5 per ounce of silver and \$0.50 per pound of copper (subject to inflation adjustments). After approximately 8.6 million ounces of gold, 40.3 million ounces of silver and 9.1 billion pounds of copper have been produced from the entire Joint Venture Property, the cash payment will increase to the lesser of the prevailing market price and \$500 per ounce of gold, \$10 per ounce of silver and \$1.10 per pound of copper (subject to inflation adjustments). To the extent that the prevailing market price is greater than the amount of the cash payment, the difference between the two will be credited against the Deposit (the net amount of the Deposit being the "Unearned Balance").

8. SANDSTORM FINANCING ARRANGEMENT (cont'd...)

In the event of a partial expropriation of the Company's interest in the Joint Venture Property, which is not reversed during the abeyance period provided for in the equity participation and funding agreement, the Company will be required to return a pro rata portion of the Deposit (the amount of the repayment not to exceed the amount of the Unearned Balance) and the metal credits that the Company is required to deliver will be reduced proportionately. In the event of a full expropriation, the full amount of the Unearned Balance must be returned with interest.

The Company is not required to deliver actual metal, and the Company may use revenue from any of its assets to purchase the requisite amount of metal credits.

The Company recorded the Deposit as deferred revenue and will recognize amounts in revenue as metal credits are delivered to Sandstorm, which is expected to commence in 2019.

In addition, the Company entered into an agreement with Sandstorm whereby the Company granted Sandstorm a 0.4% NSR royalty over certain of the Ann Mason Project claims, including the claims covering the Ann Mason and Blue Hill deposits, in return for the Sandstorm NSR Payment of \$5 million which was recorded as a recovery to acquisition costs.

The Company also completed a private placement with Sandstorm for gross proceeds of \$9,722,897.

The transactions costs related to the Sandstorm financing arrangement incurred in 2013 were \$936,926 for consultancy and advisory fees, \$192,203 for legal fees included in general and administration expenses and \$86,636 for share issuance costs.

Stock options

The Company has adopted a stock option plan (the "Plan") to grant options to directors, officers, employees and consultants. Under the Plan, the Company may grant options to acquire up to 10% of the issued and outstanding shares of the Company. Options granted can have a term of up to ten years and an exercise price typically not less than the Company's closing stock price on the last trading day before the date of grant. Vesting is determined at the discretion of the Board of Directors.

The Company uses the Black-Scholes option pricing model to determine the fair value of stock options granted. For employees, the compensation expense is amortized on a straight-line basis over the requisite service period which approximates the vesting period. Compensation expense for stock options granted to non-employees is recognized over the contract services period or, if none exists, from the date of grant until the options vest. Compensation associated with unvested options granted to non-employees is re-measured on each balance sheet date using the Black-Scholes option pricing model.

The Company uses historical data to estimate option exercise, forfeiture and employee termination within the valuation model. The risk-free interest rate is based on a treasury instrument whose term is consistent with the expected term of the stock options. The Company has not paid and does not anticipate paying dividends on its common stock; therefore, the expected dividend yield is assumed to be zero. Companies are required to utilize an estimated forfeiture rate when calculating the expense for the reporting period. Based on the best estimate, management applied the estimated forfeiture rate of Nil in determining the expense recorded in the accompanying Statements of Operations and Comprehensive Loss.

12. FINANCIAL INSTRUMENTS

The Company's financial instruments generally consist of cash and cash equivalents, receivables, deposits, accounts payable and accrued liabilities and loans payable. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest or credit risks arising from these financial instruments. The fair value of these financial instruments approximates their carrying values, except as noted below.

The Company is exposed to currency risk by incurring certain expenditures in currencies other than the Canadian dollar. The Company does not use derivative instruments to reduce this currency risk.

Fair value measurement is based on a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value which are:

Level 1 — Quoted prices that are available in active markets for identical assets or liabilities.

Level 2 — Quoted prices in active markets for similar assets that are observable.

Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

At December 31, 2013, the Company had Level 1 financial instruments, consisting of cash and cash equivalents, with a fair value of \$46,701,216.
